

COS2611 – Assessment 2 – Peer Assessment – Process

The Peer Assessment is done in four phases.

Phase 1 - Developing the code

1. See the purpose, outcomes and specifications for this project in the Peer-Assessment.
2. Download from Additional Resources --> Assessment 2 the File--> COS2611_As2_P1_Skeleton .cpp file to get started.

*Refrain from using an AI tool to help you generate the code - you must understand the complexities of the different sorting algorithms and how to generate the respective reports and reflect on them. We will use AI in a follow-up assessment to assist us in developing code.

3. Develop your C++ program and save it.

Save the .cpp file as 12345678A2P1.cpp. Replace the 12345678 with YOUR student number. The file name MUST be in this format - nothing more and nothing less. In the first line of your .cpp file, add your student number and name as evidence that you have done the coding yourself. If the file name is not in the correct format and your student details are not in the code - you will receive 0 marks for this project.

Also, should you be using self-generated classes, including those provided in the course that are not standard C++, then INCLUDE those classes in your code - you cannot assume that your fellow students will have those classes. All the code MUST be in one .cpp file.

Phase 2 - Submit your code

Add submission

Submission phase

Setup phase	Submission phase	Assessment phase	Grading evaluation phase	Closed
	Current phase ● Submit your work Open for submissions from Monday, 24 June 2024, 1:00 AM (2 days ago) Submissions deadline: Wednesday, 17 July 2024, 11:00 PM (22 days left)	Open for assessment from Thursday, 18 July 2024, 1:00 AM (22 days left) Assessment deadline: Friday, 26 July 2024, 11:00 PM (31 days left)		

Upload the .cpp file -> The option “Add submission” is NOW ACTIVE.

You have not submitted your work yet

Add submission

Take care that when you upload you again label the file correctly, 12345678A2P1, replace 12345678 WITH YOUR student number!!!!

The 'File picker' window displays options for file management. On the left, there are links for 'Recent files', 'Upload a file' (highlighted in orange), 'Private files', and 'Wikimedia'. The main area shows an 'Attachment' section with a 'Choose File' button and the filename 'cos2611_test_code2.cpp'. Below this is a 'Save as' field containing '12345678A2P1.cpp', which is highlighted in yellow and circled in orange. A red handwritten note 'save with correct file name!' with an arrow points to this field. Further down, the 'Author' field is filled with 'Petronella VAN DER MERWE'. The 'Choose licence' dropdown is set to 'Licence not specified'. An orange 'Upload this file' button is at the bottom.

The 'Submission' window shows the details of a submission. The 'Title' field contains '12345678A2P' and is highlighted in yellow. The 'Maximum number of submission attachments' is set to '1'. The 'Attachment' section shows a list of files with a table header: 'Name', 'Last modified', and 'Size'. One file is listed: '12345678A2P1.cpp' (1.3 KB), with a timestamp of '26/06/24, 08:13'. Below the table, it states 'Accepted file types: Text file .cpp' and a warning: 'Some files (scioadmin.sql) cannot be uploaded. Only file types .cpp are allowed.' At the bottom, there are 'Save changes' and 'Cancel' buttons.

Name	Last modified	Size
12345678A2P1.cpp	26/06/24, 08:13	1.3 KB

[It seems that you still have time until the due date to Edit your submission.]

Phase 3 - Testing and grading

This will happen once we reach the due date.

See instructions in Peer-Assessment

Phase 4 – Consider the feedback and comments

Once the assessment phase is closed, read the feedback and comments provided by your fellow students.
